## **DETAILED ACTION**

### ***Election/Restrictions***

1. Applicant's election of Group IV, claims 21-28, in Paper No. 6, received November 3, 2003 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). The Applicant has canceled claims 1-20 and 29-33.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 21-28 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 21, line 5, the term "recreation-related" is not clear as what constitutes this term.

Claim 26, lines 2-3, the terms "GSM, WAP, EDGE, TETRA, and Bluetooth" are not clearly defined.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 21-28, as understood, are rejected under 35 U.S.C. 103(a) as being unpatentable over Lynch et al, US 6,569,011.

Lynch discloses a wireless network, e.g. 112, where terminals, e.g. 104a, 104b, may link a virtual location of an object, e.g. virtual weapon, where delivery time, e.g. 1104, 1106, 1108, is sent from one terminal to another terminal for determining a terminal location. Lynch does not disclose the term network recreation environment. However, to have provided the virtual weapon to comprise a network recreation environment for Lynch would have been obvious to one of ordinary skill in the art. Doing such would provide an alternative form of recreation to one of ordinary skill in the art. Regarding the particular protocol used to implement the network, e.g. Bluetooth, to have provided such to carry out the communication means would have been obvious to one of ordinary skill in the art.

6. Further pertinent references of interest are noted on attached PTO-892.
